

LET THERE

BE LIGHT!

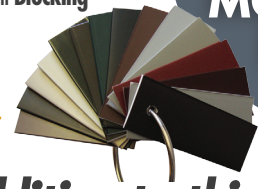

WHY SOLAR VIEW™
www.lifetimewindows.net

In a quest for efficiency, window companies have taken **The Path of Least Resistance**, in making windows more efficient, by using more layers of Low-E coatings making **Very Dark Windows** that block out most of the light from your home and make it impossible to gain passive solar energy from the sun during the winter.

Not so with "Solar View" windows! "Solar View" windows allow up to **68% More Visible Light*** to pass through into your home than comparably performing triple-pane windows while still **Blocking 71% of the Harmful UV rays.**

up to
**68%
MORE
LIGHT!**
